

Tim Teven
Designer

Studio Tim Teven
Based in Netherlands

PROFILE

A technical and material driven approach to design together with hands-on way of working allows him to play and create in an experimental way. In many of the works the production process is used as a tool to design and a leading aspect to shape the final outcome and function of the object. Treating materials in an unconventional way to rethink the process of making, allows him to find surprising techniques which then can be translated into a functional yet interesting object.

EDUCATION

- Graduated Cum Laude from the Design Academy in 2018
